

### Job Manager+

An Integrated Solution For The Grant Funded Industry

Job Manager+ can save your business time and money!

Designed from the ground up by Scoped Solutions Ltd it was developed specifically for grant funded industries such as Loft and Cavity Wall installers, Solar Panel Installers and Heating System engineers.

Job Manager+ leverages the features of IBM's secure, flexible and powerful Lotus Domino platform and uses the latest XPages technology to provide a rich, web friendly user experience.

Job Manager+ can be provided pre-installed on an IBM Series X Server to ensure your business and its applications are in safe hands. Alternatively the solution can be installed on your existing servers subject to specification.

Job Manager+ is a powerful planning, scheduling, invoicing and payroll tool that automates many processes within a business and frees substantial amounts of time so that you can focus on running the business and not just on getting to the end of the week.
